1 | The ESAF¹

The EIF SME Access to Finance Index (ESAF) is a composite indicator that summarises the state of SME external financing markets for each of the EU-27 countries. It was developed in collaboration with the London School of Economics and was first introduced in the European Small Business Finance Outlook (Kraemer-Eis et al., 2016). The ESAF provides a convenient tool to compare and benchmark country-level performances in the context of SME access to finance in the EU. For an extensive overview of the current state of SME financing markets, the reader is referred to the most recent edition of EIF's European Small Business Finance Outlook (Kraemer-Eis et al., 2023).

The ESAF index is composed of four subindices, three of which are related to different financing instruments, while the fourth covers the general macro-economic environment. In turn, each subindex is built on a set of indicators that are relevant to the financing instrument they aim to measure (Box 1). All indicators are normalised using the min-max methodology and are geometrically aggregated using equal weights.²

Methodological choices have implications for the interpretation of composite indicators. The choice for min-max normalisation implies individual countries' outcome command a relative interpretation vis-à-vis the worst and best performing country for each of the subindicators, which prevents a meaningful interpretation of individual countries' ESAF value, as well as comparisons over time of the index value. For comparisons over time, we recommend using the country rankings.

The interpretation of the outcome of a country's individual subindices should proceed with caution. Although robustness checks have been conducted to ensure that aggregate results are not driven by minor variations in individual indicators, it is important to note that the equity and macro subindices consist of only three subindicators each. These subindicators are derived from surveys and/or estimated data. When aggregated to the overall ESAF index, the influence of individual subindicators on the aggregate indicator value is limited. However, at the level of a subindex, it can be more pronounced.

This update constitutes the 10th iteration of this exercise, resulting in a ten-year long time series that starts from 2013. The current update is based on 2022 data and therefore captures the first impact of the rise in inflationary pressures and sustained geopolitical uncertainty arising from the war in Ukraine. The latest available data show that SME finance conditions were most favourable in Sweden, Germany and Finland and least favourable in Greece, Cyprus and Romania. To enhance transparency and gain a deeper understanding of the recent changes in the ESAF index, Chapter 2 | provides an extensive overview of the 2022 ESAF index and its

¹ This paper benefited from the input of Salome Gvetadze and Helmut Kraemer-Eis. We are furthermore indebted to Bonggyu Chae, Mari Magnussen-Landsem, He Li, Chavi Meattle and Jacob Simunovic, who developed the initial version of the ESAF index in the context of the 2014-2015 LSE-EIF Capstone Project.

² For an elaborate discussion on the choice of indicators and methodology, see Gvetadze et al. (2018).

subindexes, as well as a detailed overview of the driving forces behind the outcome of each EU 27 country.

Box 1: The four ESAF subindex and their indicators³

Loans:

- Percentage of SMEs using bank loans in last 6 months
- Percentage of SMEs using grants or subsidised bank loans in last 6 months
- Percentage of SMEs not applying for a bank loan because of possible rejection in last 6 months
- Interest rate for loans under EUR 250k (floating rate with IRF up to 1 year)
- Interest rate spread (under EUR 250k vs over EUR 1m for floating rate with IRF up to 1 year)

Equity:

- Venture Capital Investments / GDP
- Value of IPO market / GDP
- Percentage of SMEs using equity capital in last 6 months

Credit and Leasing:

- Percentage of SMEs using bank overdraft, credit line or credit card overdraft in last 6 months
- Percentage of SMEs not applying for the above because of fear of possible rejection in last six months
- Percentage of SMEs using leasing or hire-purchase in the last 6 months
- Median interest rate charged to SMEs for credit line or bank overdraft application in last 6 months

Macro Factors:

- Gap between actual and potential GDP
- Bank non-performing loans to total gross loans
- Percentage of SMEs feeling that there are no financing obstacles

Source: See Annex 1 for a list of data sources

³ Acronyms: IRF - Initial period of fixation of the interest rate, GDP- Gross Domestic Product, IPO – Initial Public Offering

About

... the European Investment Fund

The European Investment Fund (EIF) is Europe's leading risk finance provider for small and medium sized enterprises (SMEs) and mid-caps, with a central mission to facilitate their access to finance. As part of the European Investment Bank (EIB) Group, EIF designs, promotes and implements equity and debt financial instruments which specifically target the needs of these market segments.

In this role, EIF fosters EU objectives in support of innovation, research and development, entrepreneurship, growth, and employment. EIF manages resources on behalf of the EIB, the European Commission, national and regional authorities and other third parties. EIF support to enterprises is provided through a wide range of selected financial intermediaries across Europe. EIF is a public-private partnership whose tripartite shareholding structure includes the EIB, the European Union represented by the European Commission and various public and private financial institutions from European Union Member States and Turkey. For further information, please visit www.eif.org.

... EIF's Research & Market Analysis

Research & Market Analysis (RMA) supports EIF's strategic decision-making, product development and mandate management processes through applied research and market analyses. RMA works as internal advisor, participates in international fora and maintains liaison with many organisations and institutions.

... this Working Paper series

The EIF Working Papers are designed to make available to a wider readership selected topics and studies in relation to EIF's business. The Working Papers are edited by EIF's Research & Market Analysis and are typically authored or co-authored by EIF staff, or written in cooperation with EIF. The Working Papers are usually available only in English and distributed in electronic form (pdf).
